

## Aluminium Rainwater, Fascia and Soffit Systems (Durable Eaves Solutions)

Marley Alutec, as a leader in their field, understand how important it is for architects and specifiers to maintain their professional accreditation, and to stay informed about the changes in the construction industry. This is why, after so many years of experience and industry knowledge, Marley Alutec offers this CPD seminar which will be worth double points to RIBA Chartered Architects.

**Alutec's CPD seminar is accredited by the Royal Institute of British Architects (RIBA) and covers the required topics under RIBA's core curriculum.**

### Seminar Content

- Aluminium and the environment
- Durability and design
- Fascia, soffit and coping systems
- Rainwater systems
- BIM, technical and installation support

### Format and Registration

The seminar is available online or face-to-face. The duration is up to 1 hour giving you a valuable chance to explore the topics in more depth with plenty of time for Qs&As. By joining our seminar, you are contributing to your RIBA CPD requirements while also securing the opportunity to take advantage of our expert knowledge of sustainable rainwater systems and eaves solutions.

If attending online, we will provide detailed joining instructions in advance. If held at the participants' premises, it will include the offer of complimentary lunch buffet for delegates attending.

### About Marley Alutec

With an extensive portfolio of highly sustainable products, Marley Alutec is the UK leader in innovative aluminium rainwater, fascia, soffit and coping.

Committed to delivering the excellent service and technical expertise that only comes from partnering with a specialist manufacturer, Marley Alutec offers a full technical service, from the development of initial designs, to the delivery of detailed estimates and on-site assistance.
